

May 13, 2009

Good afternoon,

The IIP is suspending our transition to VFC-only in light of recent developments. Yesterday, a large group of key stakeholders met to discuss the possibility of funding the Universal program. The group is currently working on logistics and determining funding for such an endeavor. The group will meet again next week to determine the feasibility of funding this program. We will make a determination at that time whether or not to resume our transition to VFC-only.

**Therefore, we are asking that you do not place orders for vaccines until we are able to provide you with additional information regarding these efforts.**

I realize you all will have lots of questions, but at this time this is the only information I have.

The IMA will be sending out information to physicians' later today or tomorrow. I will forward a copy of their information once I have it available.
